Dedication

**This book is dedicated to my Mother,
who has ever till now been my inspiration.**

Preface

I entered in teaching profession in year 2008. Apart from teaching courses in Cell Biology and Genetics, I used to take classes for Intellectual Property Rights. It's interesting to see that our undergraduate and postgraduate courses' syllabi includes core course on IPR. This subject, as I see it, is the need of the present time and I think the wealth of the intellectuals, particularly in India, has to be utilized for the development of self, nation and globe at large. The purpose of writing this book is to make available a textbook in IPR for all college and university students. I maintain that the course on IPR should be introduced in early school levels so that our children should know about the legal protection of their intellectual wealth much earlier than what we came across.

I have written this book keeping the syllabus of the subject "IPR" in mind but this would be useful for the general public also. I appreciate any feedbacks from students and instructors that may be delivered directly to me electronically at *patmanju11@gmail.com*

Manju Pathak

Acknowledgments

I acknowledge my students who showed their need of study material all the time in IPR which inspired me to write a book.

Manju Pathak

Contents

<i>Dedication</i>	<i>v</i>
<i>Preface</i>	<i>vii</i>
